Reaction from:-

Concrete Floor ( 20 cms)

- Wall
- Roof Stucture
- Ballast
- Ground anchors

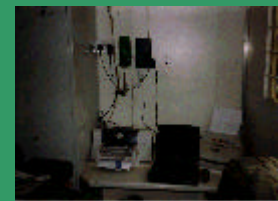

## LANKELMA TAKES SITE INVESTIGATION INTO THE 21ST CENTURY

The cone testing trucks of Lankelma have been transformed into mobile offices. The truck has the availability of a printer, a fax machine and internet access. This means that the clients and Lankelma's offices can receive data electronically by fax or e-mail at the end of every day or after every test if required.

Clients can already get their electronic reports e-mailed or receive them on a CD, in addition to the more conventional reporting on disk or paper.

Lankelma is also piloting an Extra-net scheme enabling clients with passwords to gain access to their reports and download them straight from the website. A number of clients are testing the system at the moment.

## LANKELMA OPENS NEW OFFICE IN NORTHERN IRELAND

Lankelma has successfully launched its new office in conjunction with Geodelft based near Belfast, Northern Ireland.

The arrival of our new Crawler Rig, which will be permanently based in Ireland, will increase Lankelma's strength in its already well established bespoke cone testing market in Ireland.
