

Rig weight 0.7 T

Maximum operating ram capacity 18 T

Length 1.30 m

Width 0.40 m

Height 2.50 m

Noise output at 2 m 88 dBA

Clamp arrangement 36/55 push-pull clamp

Ram stroke 1.35 m

Maximum casing size 55 mm

This robust, powerful unit is ideal for marine CPTs, sampling and instrumentation installation.

They are self-contained and supplied with a hydraulic power pack, generator and data logging system.

The rams can be mounted or bolted to the platform, or even integrated into the drilling masts to perform CPTs within boreholes to allow fast and effective testing between setting riser casings and drill-outs.
