

DANDO MULTITEC 9000

Rotary Drilling (with GEOBOR-S)

Deck engine	Turbo diesel 102 hp
Maximum operating ram capacity	45 degrees mast dump
Length	5.00 m
Width	3.60 m
Pull down	3.25 T
Pull back	9.00 T

The Dando Multitec is a high performance, multipurpose drilling rig with 9000 kg pullback.

Ideal for:

- Water wells;
- Mineral explorations;
- Core drilling;
- GSHP drilling applications;
- Geotechnical investigations.

The compact and lightweight design of the track mounted machine allows it to operate in tight spaces with limited access. It has a small footprint rotary drill rig with c.3T pulldown and 9T pullback force with a 102 hp engine.

The drill system is set up to deploy Geobor-S wireline core drilling which comprises a retractable triple tube core barrel and overshot system forming a 146 mm hole to recover high quality, undisturbed samples at 102 mm diameter. Consumables and a full system of downhole tooling are sourced from reliable international suppliers. The unit is fully marinised.
